IMPACT OF CORONAVIRUS (COVID-19)

The COVID-19 pandemic and the measures undertaken to contain it have materially changed the global economic outlook, directly and or indirectly causing large-scale economic disruption in all markets the Group operates in. The economic disruption could lead, and in some cases has led, to elevated levels of credit losses from business insolvencies and ongoing disruption to trading conditions. including supply chain disruption or delay and inflationary pressures. In an attempt to mitigate the direct or indirect economic effect of COVID-19, governments, regulators and central banks have offered significant fiscal and regulatory support in FY20 and FY21 to assist certain businesses to remain liquid and solvent, and to support employees and the unemployed. Some residual government & industry support measures continued after this time. The extent to which these efforts will reduce the adverse effects, direct and indirect, of COVID-19 remains uncertain.
